

Special heating jackets

Insulation heating jackets series HM-IJ-450

Our heating jackets are used in thermal processes and are suitable for complex forms and applications.

These heating jackets were constructed and manufactured perfectly to fit to your application. Therefore the know-how of our engineers in the technical interpretation of the different heating systems is of a great importance.

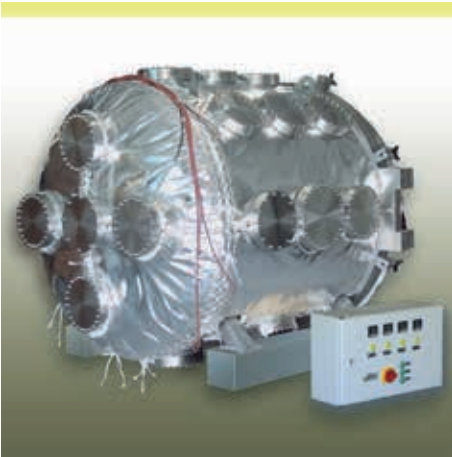

Customer specific heatings

We deliver our high-quality heating jackets also without heating elements as insulation jackets to protect heated parts for warmth losses.

The insulated jackets are also with perfect fit than our heating jackets and easy to mount.
