

Drum-tapeheater series HM-SMF

for operating temperatures up to 200°C

Description:

For standard 200l drums, which are heat or kept warm medium must. This flexible and mechanically robust tape heater meets in harsh everyday operating reliably its job.

Materials:

The Drum heater consist of a double-hinged steel casing, in which the electrical heating elements are installed and heat the entire inner surface. The outer wall is provided with heat insulation against the heat loss. This heater is splash proof and have CE declaration.

Mounting:

Two quick tension clamps enable a fast and flexible mounting. This drum tapeheater is designed so, that it can be stored as a flat mat in an unused state.

Temperature regulation:

Temperature is controlled with electronic temperature regulator and an inbuilt temperature sensor type PT100, range from 0-200°C.

Technical data

HM-SMF

nominal voltage	230 V AC
nominal power	1400 W
dimensions	1750 x 240 mm
protection class	I
protective type	IP 65 (splashproof)
max. temperature heating wire	200°C
maincable	3,0 m with schuko-plug

Order data

type	power W	order no.
HM-SMF	1400	42300240

Other lengths, voltages and power are available upon request.
